Open FTTH

Project

- Open Source Network Inventory Solution (aka AM/FM/GIS solution) for Fiber
- MIT License
- Dedicated to Fiber-To-The-Home (FTTH) Network Topologies that uses Passive Optical Network (PON) Technology
- Primary goal is to optimize FTTH Roll-out/Planning, Network Operation, Customer Installation and related Provisioning Processes
- Strongly Domain Driven Design (DDD) focus!
- Event First Architecture, CI/CD Pipeline, Devops/Microservice strategy

NB: Link til slides (som indeholder ovenviste links) findes i YouTube video description
